

Check JAVA_HOME Variable (Automatically Added):c

Check Path Variable (Automatically Added):

Check Java commands is working with valid version:

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows [Version 10.0.19044.1466]
(c) Microsoft Corporation. All rights reserved.

C:\Users\GangadharParde>java -version
openjdk version "1.8.0_322"
OpenJDK Runtime Environment (Temurin)(build 1.8.0_322-b06)
OpenJDK 64-Bit Server VM (Temurin)(build 25.322-b06, mixed mode)

C:\Users\GangadharParde>
```

Note: Each instance of the program "java.exe" on Windows is a separate JVM. If you start any two Java-based processes on your computer, they will each be running in their own JVM, whether they be Eclipse or anything else.
